PROFILE

As a passionate full-stack developer, I leverage technology to address complex problems and drive innovation. I possess a robust understanding of both frontend and full-stack development, with key skills in Node.js, Next.js, Express.js, and React-Redux. My expertise extends to Python programming and Google Cloud Computing, complemented by a strong focus on data analysis and machine learning. I am dedicated to continuous learning and am eager to explore collaboration opportunities to create impactful solutions.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer Intern - Growero.io

May 2025 - Present

- Worked as a Full Stack Developer Intern at Growero.io, where I developed responsive web applications using React.js, Node.js, and MongoDB, contributed to API integration, UI design, and assisted in deployment processes

Web Developer - E Summit'25

January 2025 - March 2025

- As a Web Developer for E-Summit'25, I designed and developed responsive web applications as the core interface for the event. I was tasked with developing the dynamic event timeline, handling essential general information, and incorporating a seamless registration portal. My coordination with cross-functional teams was pivotal in ensuring a polished and intuitive website interface as well as overall user experience

Frontend Web Developer Intern - WebinOrbit

September 2024 - November 2024

- Interned as a frontend web developer, contributing to the design and development of responsive web applications, optimizing user experiences, and collaborating closely with cross-functional teams to implement innovative solutions

PROJECTS

AI-Workspace Project

- Developed a team collaboration platform enabling users to create, edit, and share documents in real-time.
- Built using Next.js, Tailwind CSS, Node.js, Express.js, and MongoDB.
- Implemented user authentication, secure API endpoints, and scalable backend architecture.
- Designed a responsive UI for improved user experience across devices.

Noteflow

- Created a note and task management app for organizing daily activities and important notes.
- Utilized React.js for frontend, Firebase for backend services, and Material-UI for design.
- Enabled real-time note syncing and task management with full CRUD functionality.
- Focused on user-friendly interface and smooth performance across platforms.

Worked on multiple other full-stack projects involving modern web technologies like React.js, Node.js, Firebase, and MongoDB, focusing on building responsive, scalable, and user-centric applications.
